

NAKHSHAB ANSARI

Mumbai, Maharashtra | +91 9967737683 | ansarinakhshab52@gmail.com | linkedin.com/in/nakhshab-ansari | github.com/nakhshab29

PROFESSIONAL SUMMARY

Backend Software Engineer with 4.5+ years of experience building scalable, high-performance microservices using ASP.NET Core and C#. Proven track record of optimizing distributed systems handling 50,000+ daily transactions, reducing latency by 30% and improving throughput by 25%. Strong expertise in Microservices Architecture, CQRS, Event-Driven Systems, and Cloud-native development on Azure.

TECHNICAL SKILLS

Languages	C#, SQL (T-SQL), JavaScript, TypeScript, HTML5, CSS3
Backend	ASP.NET Core, Web API, MVC5, Entity Framework Core, ADO.NET, MediatR
Frontend	React, Angular, RxJS, Bootstrap
Cloud & DevOps	Azure (App Services, SQL, Cosmos DB), Docker, CI/CD, Azure DevOps, Git
Architecture	Microservices, CQRS, Event-Driven, Clean Architecture, SOLID Principles, API Gateway (Ocelot/Nginx), Repository Pattern, High Availability, DI
Databases	MS SQL Server, Azure Cosmos DB, Redis (Distributed Caching)
Messaging	RabbitMQ, Azure Service Bus

PROFESSIONAL EXPERIENCE

Senior Software Engineer

eFleet Systems Private Limited, Mumbai | Jun 2023 – Present

- Architected RESTful APIs on ASP.NET Core processing **50,000+ daily logistics transactions** for an enterprise fleet management platform.
- Led a full monolith-to-microservices migration, defining service boundaries that improved fault tolerance and eliminated single points of failure.
- Implemented **CQRS with MediatR** to decouple read/write concerns, enabling independent scaling of query-heavy services during peak load.
- Integrated **Redis Distributed Caching** for high-frequency data access patterns, reducing P95 latency and cutting database contention by **20%**.
- Designed Event-Driven inter-service communication via **RabbitMQ and Azure Service Bus**, guaranteeing eventual consistency across distributed data stores.
- Refactored complex stored procedures and applied strategic SQL indexing, delivering a **30% reduction in query response times** for reporting workflows.
- Containerized services with **Docker** and automated deployments through Azure DevOps CI/CD pipelines, reducing release cycle time from days to hours.
- Drove architecture decisions for new service design and mentored junior engineers on CQRS, Clean Architecture, and API design best practices.

Software Engineer

Troposphere Solutions, Remote | Dec 2022 – May 2023

- Designed modular backend services and RESTful endpoints using **ASP.NET Core** and Entity Framework Core, following Clean Architecture principles.
- Built an automated FAQ module with **React and Azure Cosmos DB** that deflected user queries at source, reducing support ticket volume by **15%**.
- Strengthened API security by implementing **JWT-based authentication** and multi-layer input validation, eliminating injection vulnerabilities.

Software Engineer

Data Comp Web Technologies, Mumbai | Oct 2021 – Nov 2022

- Maintained and enhanced enterprise web applications on **ASP.NET MVC5 and SQL Server**, improving UI responsiveness and backend throughput.
- Developed and shipped cross-platform mobile applications, increasing user engagement by **20%**.
- Optimized legacy SQL schemas and rewrote slow reporting queries, boosting data retrieval speed by **15%**.

KEY PROJECTS

AI-Based Vehicle Inspection Chatbot

- Built an intelligent chatbot for field agents using **NLP and Image Processing**, automating manual data entry workflows and improving data retrieval speed by **40%**. Tech stack: ASP.NET Core, Python (NLP pipeline), Azure Cognitive Services.

Vehicle Inspection Platform & Automated Reporting Engine

- Engineered a backend report generation engine using **parallel task execution** in C#, cutting manual processing time by **30%** and enabling real-time report dispatch to stakeholders.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)

2021

Lala Lajpat Rai College, Mumbai University
